DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 09/13/2004 has been entered.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being fully anticipated by Wensel et al. (U.S. 5,895,398).

As to claim 1, Wensel et al discloses in figures 1a-1f, a method of providing an obstruction removing element (10) comprising a wire (18) having a distal end coupled to an insertion element (16 (at 24)) and proximal end which is slidable on the insertion element (16) and positioning the obstruction removing element (10) in a catheter (12) with the obstruction removing element (10) in the collapsed position (shown in figure 1b).

As to claim 2, wherein distal end (24) of said insertion element (16) is considered a stop to prevent distal advancement of the proximal end of said obstruction removing element (10).

Allowable Subject Matter

2. Claims 117-119 are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to disclose or suggest the combination of means for stopping distal advancement of the proximal portion of the element to prevent expansion of the obstruction engaging element beyond the expanded position and means for preventing distal displacement of the proximal portion of the element relative to the insertion element, when the obstruction removing element is moved proximally direction.

Conclusion

4. This is a RCE of applicant's earlier Application No. 10/055,714. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
